The ultimate guide for healthy weight loss that works.

# A Letter From Our Doctor

Greetings from Dr. Spreen!

I was in private family practice for 10 years, concentrating on nutritional therapies for patients who preferred alternative options to traditional allopathic techniques. I have written two books on the subject of alternative and complementary medicine: "Nutritionally Incorrect" and the bestselling collaboration "Smart Medicine for Healthier Living" with Janet Zand. The increasing popularity of 'The Nutrition Physician' also led to assignments as a nutrition expert for "America Online" and "iVillage-The Women's Network," followed by positions on the medical review board of the Discovery Health Channel and the Health Sciences Institute.

During this time, I met the co-founders of Metabolic Research Center and was impressed by both the program's techniques and successes.

There are different techniques for the treatment of weight loss, but having examined the approach taken by Metabolic Research Center; this is the one that I recommend to you for it is completely balanced nutritionally, supplementally, and philosophically.

**I recommend the Metabolic Majic Weight Loss plan for your good health and successful weight loss!**

**Allan N. Spreen, MD**  
America's Nutrition Physician

\*Note: It is always recommended that you consult a physician before undertaking a weight loss program.

# Maximize Your Results

## Four tips for getting the most out of your program:

- ✔ Drink lots of water (at least 64 oz. per day). You can add up to 1 Tbsp. of lemon juice in your water per day.
- ✔ Plan your meals and prep foods ahead of time so that if a craving hits, you're more inclined to stay away from convenience foods.
- ✔ Take Ubiquinol CoQ10, MRC-6, and EZ Melts Sublingual B12 per the label instructions or as recommended by a healthcare professional to help stay in control and on top of your healthy goals
- ✔ Engage in physical activity three times per week - remembering that physical activity doesn't have to mean "going to the gym." Move at a level and pace that works for you and your body.

## Frequently Asked Questions

### **Why are the protein drinks (or High Nutrient Supplements) important?**

The protein drinks are key to your weight loss success on our program. They provide you with 15g of high quality collagen or whey protein per serving. Protein helps preserve lean muscle mass, promotes satiety, and supports healthy bones. To maximize your program, women should have up to four HNS drinks per day and men should have up to five. [Learn more here.](#)

### **Why do I have to drink 64 oz. of water?**

Water has no calories, making it a perfect pair for managing body weight and reducing caloric intake when substituted for drinks with calories. Water also helps keep a normal temperature, lubricate and cushion joints, protect tissues, and rid the body of waste. [Learn more here.](#)

### **Can I put something in my water like Crystal Light or buy bottled flavored water from the store?**

Yes, you can, but these drinks do not count towards your daily water intake! When anything aside from lemon is added to water, it does not as effectively flush and cleanse the kidneys. Pro tip: when it comes to water, it should be "clear" to count.

### **Why do I experience plateaus during my weight loss?**

Contrary to popular belief, plateaus are not a sign of failure. They are a normal part of the weight loss process. If your plateau continues over a week, it may be time to talk to a weight loss coach about your menu to see if there is something you can do to kick-start the weight loss again. [Learn more here.](#)

### **What if I want to eat more variety than what's on this meal plan?**

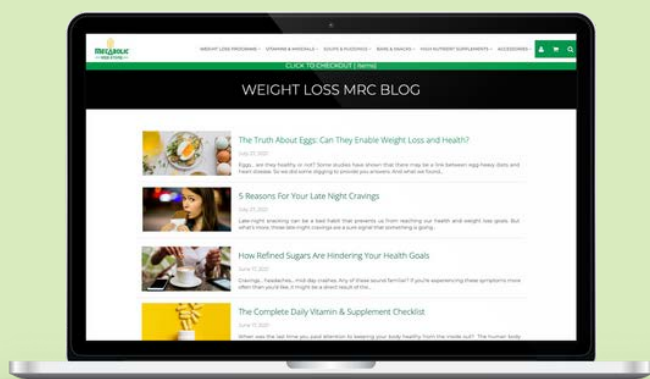

Our program is designed to help rid your system of excess sugars so you regain and stay in control. Our customers find that the faster they are free of sugars, the easier their program becomes. All bodies are different, though, and if more variety is what you need to find success, then ask a weight loss coach for a customized menu! Email [websupport@emetabolic.com](mailto:websupport@emetabolic.com) to be connected with a Weight Loss Coach.
